

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts can be purposely marked for use in dangerous places. A labeled truck indicates the design has met the lowest standards of ANSI/UL 558 meant for engine powered lift trucks or ANSI/UL 583 intended for electric trucks for the type of label put.

Applications for marked forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Check with your local insurance provider and Fire Marshall for additional information concerning the permitted uses of industrial powered trucks in your application.

If the particular lift truck meets the outlined criteria, labels can be attached. A labeled lift truck would show the type of designation put on the nameplate and would have a properly corresponding label attached.
