

Toyota Forklift Parts

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also called TMHU, continues to be the top selling lift truck provider in the U.S. This company has been situated out of Irvine, California for well over 40 years, providing a wide-ranging line of quality lift trucks. With a remarkable reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the foundation of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continuous development, and its environmental methods. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, associates Toyota's accomplishment to its stout commitment to manufacture the finest quality lift vehicles while delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's biggest lift truck provider and is among the magazines prominent World's Most Admired Companies.

Redefining Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other organizations and no other lift truck maker can match Toyota's history of protecting the natural environment while simultaneously advancing the economy. Environmental responsibility is a key characteristic of company decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more elaborate 2010 emission standards. The finished invention is a lift truck that creates 70% less smog forming emissions than the existing Federal standards allow.

Moreover in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their responsibility to the environment. Upwards of 57,000 trees have been planted in district parks and national forests damaged by environmental causes such as fires, as a result of this relationship. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's network of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift vehicles provide better efficiency, visibility, ergonomics and durability, and most importantly, the industry's leading safety technology. The company's System of Active Stability, often known as "SAS"•, helps lessen the chance of mishaps and injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability can discern circumstances that may lead to lateral unsteadiness and possible lateral overturn. When any of these conditions have been sensed, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding durability.

SAS was originally introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS have been integrated into nearly all of Toyota's internal combustion models. It is standard gear on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's measure of excellence reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training program to help purchasers meet OSHA standard 1910.178. Education services, video tutorials and assorted resources, covering a wide scope of subjects-from personal safety, to OSHA rules, to surface and load situations, are offered through the vendor network.

Ever since the transaction of its first lift vehicle in the U.S. to the construction of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid existence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the entire commitment exceeding \$113 million dollars.

The modern NCC was designed to operate for TMHU customers and sellers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a education center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most complete and inclusive client support and customer service in the industry. The company's new and Certified Used lift vehicles, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall customer satisfaction.
