Doosan Infracore America is the fastest rising forklift and lift truck corporation in the North American market, due to its exceptional level of product performance and their persistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. forklift division stationed in Cleveland has a expert team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Early sales of this industrial equipment focused on large business communities, the armed forces and on state-run corporations. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo started the first domestic forklift business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of considerable growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling industry. This joint-venture proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a global sales system and started exporting versions they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
